DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species I. Figures 1a and 1b show a removable metal plate;
- Species II. Figure 2a shows an outrigger integrated on top of the ski;
- Species III. Figure 2b shows an outrigger integrated internally with a ski;
- Species IV. Figure 3 shows a plate with outriggers located below the plate;
- Species V. Figures 4a and 4b show a ski with outriggers that extend most of the length of the ski;
- Species VI. Figures 5a and 5b show a ski with several outriggers;
- Species VII. Figure 6a shows a metal plate with serrated edges;
- Species VIII. Figure 6b shows a metal plate with removable serrated edges;
- Species IX. Figure 6c shows a metal plate with closely spaced serrations;
- Species X. Figure 6d shows a metal plate with a pair of outriggers on a side;
- Species XI. Figure 6e shows a plate with outriggers of differing lengths;
- Species XII. Figure 6f shows a plate with non-parallel outriggers.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 27 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
